

SKI TOURING & ALPINE SKIING

SCOUT 11

The Scout is the ski touring binding with probably the widest range of uses. Whether it is a challenging ski tour or a day on the slopes: It is almost as light as tech bindings and, in addition to outstanding downhill performance, offers the safety and ease of use of alpine bindings.

As orientation guide for Fritschi retailers we have established an overview (not conclusive) of the **current** boot models concerning compatibility with Fritschi bindings. We considered only boots with Pin Tech inserts. We recommend to check the functionality and compatibility of all bindings with the *4-items check*.

Boots compatible with Fritschi Scout
