

PERFORMANCE TOURING VIPEC EVO 12

The multi-faceted Vipec Evo is the perfect choice for both experienced ski tourers and newcomers. It is ideally suited to high-mountain tours with challenging downhill runs or for the leisurely exploration of snow-covered mountain landscapes.

As orientation guide for Fritschi retailers we have established an overview (not conclusive) of the **current** boot models concerning compatibility with Fritschi bindings. We considered only boots with Pin Tech inserts. We recommend to check the functionality and compatibility of all bindings with the *4-items check*.

Boots compatible with Fritschi Vipec Evo
