

TOURING

XENIC PLUS 12/10

The Xenic is the most complete lightweight binding for high-mountain skiers who attack full-on when going up, but also go full-speed downhill on any kind of alpine terrain. It also suits those who are working on their fitness on the slope.

As orientation guide for Fritschi retailers we have established an overview (not conclusive) of the **current** boot models concerning compatibility with Fritschi bindings. We considered only boots with Pin Tech inserts. We recommend to check the functionality and compatibility of all bindings with the *4-items check*.

Boots compatible with Fritschi Xenic

We recommend to remove the *Positioner* when the walking angle is not sufficient.

Brand	Models
Atomic	Hawx Ultra XTD, Hawx Prime XTD, Hawx Magma XTD, Backland XTD, Backland
